Sir:

In reviewing this application the Applicant formed the opinion that two matters believed to be significant to issue as to the patentability of the claims which he considered to be obvious may not even have been apparent to the Examiner and may not have been considered by him. This document is being filed to call attention to these items. It is also intended to correct two minor errors in claim 20 which are believed to be either typographical errors or mistakes in copying from a draft of this claim 20. In order to correct these latter matters please amend claim 20 as indicated by the typing in the following list of all of the claims presented at this time.
